The location of LINEA Residences, inserted in a prime and central area of the city, between Saldanha and the Campo Grande Gardens, with easy access to the main entry and exit routes of Lisbon and quick access to the airport, the unique physical characteristics of the property - visible, for example, in the Viúva Lamego tiles lining the facades - were the ideal mix to design a unique residential development in this area of Lisbon".
With a project by the renowned architect André Caiado from the Contacto Atlântico studio, the building, formerly dedicated to offices, has now been transformed into 36 flats, distributed in 1 to 4 bedrooms typologies and two Urban Villas, with private pool and terrace, also integrating 2 commercial spaces.
All residential units have underground parking with smart electric charging and private storage spaces.
Besides the generous outdoor areas, LINEA Residences will have a communal swimming pool, gym, sauna and Turkish bath.
