1 bedroom apartment in the city of Porto - Modern and Smart Design

COSTA CABRAL FLATS is a building designed by the architects Pedro Cardoso and Nuno Campos, spread over 6 floors - 4 residential and 2 parking/storage with a private garden at the back.

All apartments have balconies and terraces, combining design, comfort and functionality, and are intended for those who want to live next to the university campus in an area with excellent access and transport to downtown Porto.

This residential building on Rua Costa Cabral, in Porto, with a markedly contemporary architecture, with a layout aimed at a young audience, favors functionality and design.

It is located in a consolidated residential area in great transformation, with local shops, supermarkets and restaurants, in the surroundings of the university campus and Hospital de S. João, a few minutes from the ring road, internal belt road and access to the A3.

General characteristics:□□
