On the first floor of a classic building with a late 19th-century façade, we find this bright 262-square-meter apartment. This property offers great potential for renovation, providing the opportunity to transform it into a trophy residence in one of the most cosmopolitan areas of Madrid. The apartment consists of a spacious living room with three balconies, a large dining room, and plenty of open space. The proposed renovation project includes three generously sized double suites, the master with a walk-in closet, a guest toilet, and an open-plan kitchen integrated into the living room, along with an independent laundry room. The location of this property is unbeatable, situated in the heart of the Justicia neighborhood, right next to the Santa Bárbara Church and just a stone’s throw from Madrid’s finest fashion boutiques and art galleries. Justicia is one of the most cosmopolitan and chic neighborhoods in Madrid. With its rich cultural and commercial offerings and the beautifully maintained façades of its buildings, it evokes the feeling of living in a Parisian neighborhood.
