KUHÁ Villas – Exclusive new development in Playa del Carmen

In the heart of the Mayan jungle, within a private community designed under the philosophy of slow living, are the KUHÁ Villas: a new development that redefines luxury in Playa del Carmen. Contemporary architecture that dialogues with nature, noble materials, natural light and open spaces that integrate with the vegetation create a concept of "barefoot luxury", where privacy and well-being are the protagonists. Each villa has been conceived to offer spaciousness, harmony and a permanent connection with the environment. The development has three types of villas, with different layouts and surfaces, adapted to different lifestyles, always maintaining the same standard of exclusivity and design. Located in Zona Diamante, just minutes from the best beaches in the Caribbean and the main points of interest in Playa del Carmen, KUHÁ combines serenity, added value and a unique residential experience.
